WORLD ECONOMIC DEVELOPMENT REGULATED TOKENIZATION BANKERS AUTHORITY INC.

EUNR

EU'S NATURE RESTORATION ECOSYSTEMS AND MITIGATE CLIMATE CHANGE LEGAL TENDER TOKEN

DESCRIPTION

The EUNR Token (EU's Nature Restoration Ecosystems and Mitigate Climate Change Legal Tender Token) is an issuer-defined digital instrument designed to represent structured economic participation in environmental and climate-impact initiatives across the European Union, including nature-restoration programs, biodiversity recovery projects, carbon-sequestration initiatives, sustainable land-use systems, and other qualifying ecosystem-service assets. The issuer establishes the underlying project framework, the measurement and verification methodology, the revenue- or benefit-sharing mechanics, and all transfer or redemption conditions, allowing EUNR to function as a compliant, contract-based vehicle for allocating and transacting value derived from EU-aligned environmental and climate-mitigation activities.

USAGE

The EUNR Token is used by project sponsors, environmental operators, and institutional participants to allocate economic participation in EU-aligned environmental and climate-impact initiatives. For example, an EUNR issuance may support nature-restoration programs, biodiversity recovery projects, or carbon-sequestration initiatives, with value linked to verified environmental outcomes or ecosystem services. This allows environmental and climate-mitigation activities to be funded and transacted in a compliant, structured format.
