WORLD ECONOMIC DEVELOPMENT REGULATED TOKENIZATION BANKERS AUTHORITY INC.

EUROPEAN UNION LEGAL TENDER E-TOKEN

DESCRIPTION

The EUTX Token (European Union Legal Tender E-Token) is an issuer-defined digital instrument structured to represent economic exposure to assets, receivables, or contractual payment streams denominated in, or otherwise anchored to, the legal-tender framework of the European Union. The issuer determines the composition of the underlying asset base, the distribution or payment mechanics, and all applicable transfer or redemption conditions, enabling EUTX to function as a compliant, contract-based vehicle for holding and transacting EU-denominated economic interests.

USAGE

The EUTX Token is used by commercial and financial participants to hold or transact economic interests denominated in, or anchored to, European Union legal tender. For example, an EUTX issuance may represent participation in euro-denominated receivables, contractual payment streams, or EU-based commercial assets. This enables EU-denominated economic exposure to be allocated and transferred under issuer-defined contractual terms.
